Art.Nr.: GBF-014004-R

57,00CHF / Set

incl. 8,1% VAT plus 12,00CHF DHL-Shipping

Ready for dispatch within 1–2 working days. Delivery time approx. 3–5 working days!

Product information

ABS-DELETE Brake Line Set (Rear Wheel)

Note: The vehicle is equipped with an ABS system as standard. Using and installing these brake lines will deactivate the ABS system. As a result, the vehicle’s operating permit in Germany will be revoked. The vehicle may no longer be driven on public roads.

Optional accessories can be ordered directly with this item.

Scope of delivery: Number of brake lines as specified in the product description. (Please order hollow screws for ABS-Delete kits separately)

#WhatsStoppingYou #RideTheBestYouCan #RideHEL

✓ Hollow screws*, O-rings, brackets, guides, or manifolds are already included in the kit!!

Compare prices! Ready-to-install brake line kits for your vehicle from HEL Performance always come with the necessary fittings and hollow screws made of the finest stainless steel, copper O-rings, rubber guides (e.g., grommets), or brackets. Distributor blocks or connection blocks—for example, for connecting to the metal ABS lines—are also included and have already been permanently crimped to the hose during production. Lens-shaped seals, as used by many other suppliers, are completely eliminated, since the blocks themselves feature the appropriate sealing cone. At HEL Performance, you pay no extra charge for any of this!!!!
*Some lines do not require a hollow screw, as they already have an internal or external threaded connection.
#LessTinkering #YouGetWhatYouNeed #RideTheBestYouCan #RideHEL

✓ with ABE, parts certification, or technical certification for special modifications

Sometimes you simply need more than just an ABE or a parts certificate. For special applications and modifications, we also offer a purely technical report. Regardless of the vehicle type or intended use! This gives you maximum flexibility for your project!
Note: No ABE is required for clutch lines!
#FitAndRide

✓ Stainless steel fittings, at no extra charge, can be rotated at any time

No matter how far or how often!! Even back-and-forth movement is no problem thanks to HEL Performance’s unique design. You’ve got our word on it!!!!!
Stainless steel fittings are our standard, at no extra charge! We won’t put anything else on your bike or car!
#EasyMount #NoCompromises

✓ PVC sheathing at no extra charge!

Already included in the price: PVC sheathing, available in up to 14 different colors of your choice.
#BetterOptic

✓ Custom-fit wiring kits!

Product information

Easy installation, since every brake lir
mounts—already attached to the hose
#EasyMount #YouGetWhatYouNeed

Precise brake pedal feel, improved brake modulation

Thanks to improved modulation and a precise bite point, you'll gain a whole new level of control over the entire braking process!
#RideTheBestYouCan

All mounting parts are developed and manufactured by HEL in England!

HEL Performance has an arsenal of machines on which we manufacture all fittings ourselves from the finest stainless steel. This allows us to fully control every process, from the very first step all the way to the finished brake line. You get the best product straight from our factory.
#NoCompromise

Brake lines manufactured in Germany (Made in Germany)

Every HEL Performance line is assembled in-house using the best stainless steel fittings and then permanently crimped on modern, digitally controlled machinery. Every line undergoes a final inspection before it is shipped.
#SafetyFirst

Technology proven in motorsports

Our products are used in the highest levels of motorsports. Whether it's MotoGP, Moto2, Moto3, or the EWC (the premier class in terms of material requirements), you always get the same, top-notch HEL quality!
#RideTheBestYouCan #RideHEL #TeamHEL

Stainless steel braided brake lines and kits from **HEL Performance** optimize your motorcycle's braking system. With improved modulation and a precise bite point, you'll gain a whole new level of control over the entire braking process! Whether you ride a MotoGP, Moto2, Moto3, WSBK, IDM, or EWC motorcycle—or even a simple 50cc scooter—every vehicle needs the best possible braking system in every situation. Stainless steel braided brake lines from HEL Performance are the key to achieving this.

The fine line between victory and defeat

Every kilometer of a racetrack highlights just how important a well-balanced braking system is. Perfect control gives you the confidence you need, because the difference between a good rider and an average one is that one has their speed under control, while the other does not. That's why we at HEL Performance manufacture the best hoses, giving you the control you need for peak performance.

With us, you'll find the right brake line kit for your vehicle and get exactly what you expect: high-quality materials, excellent performance, and visually striking brake lines.

We use only stainless steel components for all parts of our lines—unlike other manufacturers, who use steel fittings that rust over time and pose a safety risk.

Choose your desired color and click "Add to Cart" to order your HEL brake lines.

HEL Performance offers brake line kits with so-called **"alternative routing" — even with ABE certification!**

Product information

For many models, we offer variou

OEM, like the original (Standard Kit): The brake lines match an original replacement part in length, number, and routing.

Alternatively, Full Length: Two lines routed directly from the brake master cylinder—one to the right and one to the left—to the brake calipers.

Alternatively, Over the Mudguard: One line runs directly from the brake master cylinder to the right brake caliper; the second runs from there over the fender to the left brake caliper.

HEL Performance - Always No. 1 - What's Stopping You?

You can also find additional information and instructions in the “Package Contents” tab, as well as in the “Questions and Answers”section
