Product information

HEL PERFORMANCE 2-Piston Rear Brake Caliper, 64 mm, Black

Art.Nr.: HEL-BZ-2-R64-BK

425,00CHF / pcs.

incl. 8,1% VAT plus 12,00CHF DHL-Shipping

Ready for dispatch within 1–2 working days. Delivery time approx. 3–5 working days!

HEL-Performance® 2-piston CNC brake caliper, axial, 64 mm bore spacing, 2 x 30 mm stainless steel pistons

The rear brake caliper from HEL Performance is equipped with 1 pad retaining pin. To replace the brake pads, simply unscrew this pin briefly and replace the pads. The calipers should be blown out with air before reinstallation to ensure that the internal surfaces are clean. Separate bleed

Product information

nipples ensure that the bleed point is circumferential fluid path. This means system.

Our brake calipers weigh approximately 420 grams (without pads and retaining pin) and are equipped with stainless steel pistons. Stainless steel acts as a heat sink, dissipating the heat generated by braking. The brake fluid heats up less. The boiling point of brake fluids varies depending on the specific fluid used. Storing the heat in the pistons rather than heating the fluid improves braking performance over a longer period—perfect for the track.

We manufacture our brake calipers exclusively on state-of-the-art CNC machines from solid 6082-T6 billet aluminum. Many mass-produced brake calipers are forged, but this limits their design possibilities. The forged parts must also be machined for threads and the internal flow path, as forging is unable to produce these details. We offer the very highest product quality. The finish is breathtaking, with every part machined to CNC precision. We maximize weight savings and minimize material usage. Radial mounting of two-piece brake pads with two pads per caliper.

- 2-stainless-steel-piston (30 mm) caliper design.
- The brake caliper is made of solid 6082-T6 aluminum.
- High-temperature seals.
- 64 mm axial mounts for many modern motorcycles.
- The kit includes an instruction manual with all the information regarding installation, bleeding, maintenance, and more.

The calipers are designed to accommodate stock brake pads for well-known supersport motorcycles. This gives you a wide selection of brake pads from nearly all manufacturers and suppliers.

We currently offer EBC-type brake pads in various compound options as an option.

Package Contents:

- 1 x CNC-machined brake caliper
- 1 x stainless steel hollow screw with copper sealing ring

Compatible accessories, not included: EBC-type brake pads

Note: Brake master cylinders and calipers from HEL Performance are not compatible with Castrol's SRF Racing brake fluid! Using this brake fluid may, under certain circumstances, cause seals to fail.

available options

Brake fluid

MOTUL DOT 3&4, 0.5 liter, instead of 8.95 only 7.60 (15.20/liter) (+8,80CHF)

MOTUL DOT 3&4, 2 x 0.5 liter, instead of 17.90 only 13.90 (13.90/liter) (+17,50CHF)

MOTUL-Racing RBF600 DOT4, 0.5 liter, instead of 25.25 only 16.90 (33.80/liter) (+16,60CHF)

MOTUL-Racing RBF600 DOT4, 2 x 0.5 liter, instead of 50.50 only 28.80 (28.80/liter) (+33,20CHF)

No thanks, no brake fluid!
