Product information

(Incl. stainless steel banjo bolts* (*for connections with ring connection/banjo), incl. copper sealing rings)

#WhatsStoppingYou #RideTheBestYouCan #RideHEL

✓ Banjo bolts*, sealing rings, holders, guides or distributors are already included in the kit!

Compare the prices! Ready-to-select brake line kits for your vehicle are always supplied by HEL Performance with the required connections and banjo bolts made of the finest stainless steel, copper sealing rings, rubber guides (e.g. grommets) or brackets. Manifold or connection blocks, e.g. to the metal lines from the ABS, are also included and have already been firmly pressed onto the hose during production. Lens seals, as used by many other suppliers, are completely unnecessary as the blocks themselves have the appropriate sealing cone. HEL Performance does not charge extra for any of this!!!!
*Somelines do not require a banjo bolt as they themselves have a connection with an internal or external thread.
#LessTinkering #YouGetWhatYouNeed #RideTheBestYouCan #RideHEL

✓ with ABE, parts certificate or technical certificate for special conversions

Sometimes it just has to be more than an ABE or a parts certificate. We also offer a purely technical certificate for special applications and conversions. Regardless of the vehicle type or intended use! This gives you maximum flexibility for your project!
Note: No ABE is required for clutch lines!
#FitAndRide

✓ Stainless steel connections, at no extra charge, can be twisted at any time

No matter how far and often! Even back and forth is no problem with the unique HEL Performance design. Hand on it !!!!!
Stainless steel connections are our standard, at no extra charge! Nothing else comes on our bike or car!
#EasyMount #NoCompromizes

✓ PVC coating at no extra charge!

Already included in the price, PVC coating in up to 14 different colors freely selectable.
#BetterOptic

✓ Custom-fit cable kits !

Easy installation, as the necessary accessories such as the required banjo bolts*, sealing rings and brackets on the hose are included with every brake line kit! No hidden additional costs

Product information

Precise pressure point, better modulat

Better modulation and a precise pressure point give you completely new control over the entire braking process!
#RideTheBestYouCan

Development and production of all connecting parts at HEL in England!

HEL Performance has an arsenal of machines on which all connecting parts are manufactured in-house from the finest stainless steel. This enables us to fully control all processes from the first step to the finished brake line. You get the best product from our company.
#NoCompromize

Production of the lines in Germany (Made in Germany)

Every HEL Performance line is combined in-house with the best stainless steel fittings and then permanently pressed on modern, digitally controlled systems. Every pipe undergoes a final inspection before it is delivered.
#SafetyFirst

Motorsport proven technology

Our products are used in the highest motorsport classes. Whether MotoGP, Moto-2, Moto-3, EWC (the premier class of material requirements). You always get the same and best HEL quality!
#RideTheBestYouCan #RideHEL #TeamHEL

Stainless steel brake lines and kits from **HEL Performance** optimize the brake system of your motorcycle. Better modulation and a precise pressure point give you completely new control over the entire braking process! No matter whether you ride a MotoGP, Moto-2, Moto3, WSBK, IDM, EWC motorcycle or a simple 50cc scooter. Every vehicle must have the best possible braking system in every situation. Precious steel flex brake lines from HEL Performance are the key to this.

The fine line between victory and defeat

On every kilometer of a race track, it becomes clear how important a well-balanced brake system is. Perfect control gives you the confidence you need because the difference between a good rider and an average rider is that one has speed under control, the other does not. That's why here at HEL Performance we make the best lines and you have the control you need for top performance.

With us you will find the right brake line kit for your vehicle and get what you expect, high quality materials, excellent performance and visually outstanding brake lines.

We only use stainless steel components for all parts of our lines and do not use steel connections like other manufacturers, which rust over the course of their service life and again pose a safety risk.

Choose your desired color and click on Add to cart to order your HEL brake lines.

HEL Performance offers you brake line kits in the so-called **"alternative installation method", also with ABE!**

We offer different installation variants for many models:

OEM, as original (standard kit): The brake lines correspond in length, number and routing to an original spare part.

Alternative,**Full Length:** Two lines routed directly from the brake pump, one to the right and one to the left, to the brake callipers.
