Product information

HEL-Performance® Thumb Brake Pump TB-2 - Short Lever (70 mm)

We’re continuing to move forward with new products from HEL Performance.
Next, we’re introducing the new TB-2 thumb brake pump.

- The TB-2 is the successor to the already successful TB-1.
- With its many adjustment options, it should meet all your personal needs.
- The clamp is mounted directly on the handlebars—not on the fork, as was previously the case. The pump can be positioned as desired.
- The lever spacing can be easily adjusted at any time—just like on a radial brake pump—using the adjustment wheel.

Thumb, what more could you want!! ?? !!

It is available in two versions:
a) 13 mm piston diameter, HARTCOAT BLACK housing
b) 13 mm piston diameter, HARTCOAT GREY housing

The lever itself is always supplied with a black anodized finish.

The clamp for mounting on the handlebar/stem has a 22mm diameter

Both the housing and the lever are milled from solid stock at HEL Performance in Exeter (UK) using brand-new CNC machining centers.

Weight: Approx. 265 grams
Material: Housing / Lever = 6082-T6 aluminum, milled from solid stock
Pistons and screws = stainless steel
Housing: Black or gray hard-coated
Lever: Anodized

Package contents:
1 x thumb brake cylinder with brake lever. 22 mm handlebar clamp, installation/maintenance instructions.
1 x M10x1.00 stainless steel hollow screw with copper O-rings

Accessories (not included): Expansion tank and connecting hose

We’ve created an FAQ article on how to connect a thumb brake pump. **FAQ article: Thumb Brake Pump**!

#WhatsStoppingYou

Note: Brake pumps and calipers from HEL Performance are not compatible with Castrol’s SRF Racing brake fluid! Using this brake fluid may cause seals to fail under certain conditions.
