HEL PERFORMANCE CNC COMBINATION BRAKE MASTER CYLINDER FOR Rear Wheel

Art.Nr.: HEL-HRMC-DP

322,00CHF / pcs.

incl. 8,1% VAT plus 12,00CHF DHL-Shipping

🕒 Ready for dispatch within 1-2 working days. Delivery time approx. 3-5 working days!

HEL-Performance® Combined Rear Brake Pump, 13mm Piston Diameter!

Product information

The combination brake pump for the i
used in conjunction with the foot brak

However, an additional hand-operated brake pump is permitted.

The new combination brake pump has two connections:

- A) M12x1.00 thread for the handlebar-mounted pump (e.g., thumb brake pump)
- B) M10x1.00 thread for the line leading to the rear brake caliper

So how does it work?

Quite simply, the pump on the handlebars can be operated as long as the combined brake pump is not pressed.
The pressure is routed directly through the combination brake pump to the rear brake caliper.

However, when the handlebar pump is pressed, the combined brake pump can also be actuated.

In principle, the two pumps are arranged in series.

If the combined brake pump is pressed, you can press the handlebar pump as much as you want. Nothing happens because the inlet (M12x1.00) is "sealed off" by the piston in the combined brake pump.

Weight: Approx. 100 grams

Material: Housing = 6082-T6 aluminum, machined from solid

Piston and screws = stainless steel

Housing: Anodized

Mounting: 1 x hole for M6 screw, 1 x slotted hole for M6 screw, hole spacing 40-50 mm

Package Contents:

- 1 combination brake cylinder, 13 mm piston diameter
- 1 fork mount for brake lever
- 2 stainless steel hollow screws: 1 x M10x1.00 and 1 x M12x1.00, each with copper O-rings

WhatsStoppingYou

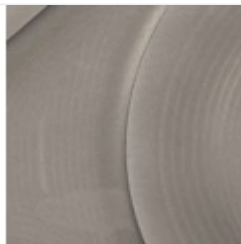

Note: HEL Performance brake pumps and calipers are not compatible with Castrol's SRF Racing brake fluid! Using this brake fluid may cause seals to fail under certain conditions.
