

Product information

Fiberglass Heat-Resistant Tubing, ID: 6.4 mm, Black, Silicone-Coated

Art.Nr.: HEAT2-064-BK

33,00CHF / meters

baseprice: 33,00CHF / meters

incl. 8,1% VAT plus 12,00CHF DHL-Shipping

 Ready for dispatch within 1-2 working days. Delivery time approx. 3-5 working days!

Heat-resistant tubing, fiberglass with silicone coating, black, inner diameter 6.4 mm

Highly flexible fiberglass tubing with a silicone coating for environments where permanent protection against constant temperatures above 250 degrees Celsius is absolutely essential.

It is designed to protect hoses, lines, and wiring harnesses exposed to extreme heat, open flames, molten splinters, or welding sparks from damage. This thick, high-temperature-resistant fiberglass fire-resistant hose is coated with an impermeable layer of thick silicone, yet remains flexible enough to be bent to tight radii. According to the manufacturer, it is resistant to all automotive chemicals and also offers excellent protection against abrasion and punctures.

Compatible with HEL steel-braided brake lines (coating can only be applied before production, as the fittings do not fit through the hose.)

Sold in increments of 0.5 m

Inner diameter: approx. 6.4 mm

Outer diameter: approx. 10 mm

Product information

Material: Fiberglass with silicone coat

Steel-braided brake lines and kits from HEL Performance:

HEL-Performance® brake line kit, including hollow screws** and accessories**

- No expansion of the lines at high temperatures
- Eliminates the spongy feeling in the brake lever
- Direct and precise braking response
- Teflon inner liner with stainless steel jacket
- Exclusively stainless steel fittings
- Lower maintenance costs for the braking system
- Technology proven in motorsports
